

DINESHKUMAR K

Senior Network Engineer | Network Implementation | Network Automation | SD-WAN | Cisco Catalyst Center | Juniper Mist

Erode, India | +91-9585885884 | dineshksp16@gmail.com | linkedin.com/in/dineszk

PROFESSIONAL SUMMARY

Network engineering professional with 10+ years of experience in enterprise network implementation, migration, operations and lifecycle management across Cisco, Aruba, Juniper and Arista environments. Strong hands-on experience in Routing & Switching, enterprise wireless, SD-WAN, Cisco Catalyst Center (DNAC), Juniper Mist, Aruba Central and network monitoring platforms. Experienced in Python-based network automation, API integrations, Power BI reporting, security-compliance automation, monitoring integrations and multi-vendor AIOps. Experienced in taking newly implemented networks through testing, operational support and handover, and in creating DNAC SOPs for operations teams.

CORE SKILLS

Routing	BGP, OSPF, EIGRP, IS-IS, MPLS
Switching	VLAN, STP, RSTP, MSTP, LACP, PAgP, VTP, HSRP, VRRP, GLBP, VSS
Wireless	Aruba AP/IAP, Juniper Mist APs, enterprise wireless implementation and troubleshooting
SD-WAN	Aruba Central, Cisco Meraki, Versa, Viptela
SDA / Management	Cisco Catalyst Center (DNAC), Aruba Central, Juniper Mist, Arista CloudVision
Automation	Python, Netmiko, NAPALM, Nornir, Ansible, YAML, Jinja2, REST/API integration, GitHub
DDI / NAC	Infoblox DNS/DHCP/IPAM, Aruba ClearPass, Cisco ISE (Basics)
Monitoring / ITSM	ScienceLogic, Splunk, HP IMC, Cisco Prime, SolarWinds, ServiceNow, BMC Remedy, Oracle ITSM
Security / Compliance	RSA ILM, DNAC certificate compliance, access review automation, security documentation

PROFESSIONAL EXPERIENCE

Senior Consultant — Capgemini Technology Services | Jun 2022 – Present | Coimbatore, India | Project: GIT

- Designed, implemented and maintained enterprise network infrastructure covering Routing, Switching, Wireless, LAN, SDA and SD-WAN technologies across Cisco, Aruba, Juniper and Arista environments.
- Led the implementation of a new enterprise site using Juniper switches and APs, managed through Juniper Mist; this was the first site implemented with Juniper switching and wireless in the environment.
- Supported the complete network lifecycle for newly implemented environments, including implementation, configuration, testing, troubleshooting, operational support, documentation and handover to the operations team.
- Worked on Cisco network migration activities for another newly acquired/procured entity and supported integration into the enterprise network environment.
- Worked on enterprise-wide EOL/EOS network hardware replacement activities, supporting identification, planning and implementation of replacement devices.
- Created Bills of Materials (BOMs) for new network projects based on technical requirements and approved project budgets and supported hardware/software sourcing.
- Developed Python scripts to automate Cisco switch configuration updates, reducing repetitive manual configuration activities.
- Integrated Cisco Catalyst Center (DNAC) APIs with Power BI to synchronize network inventory and generate consolidated asset reporting for non-DNAC device compliance, avoiding manual inventory consolidation.
- Implemented RSA ILM integration to automate user access review activities as part of security compliance.
- Integrated Juniper Mist with Splunk for centralized monitoring and event visibility.
- Integrated Juniper Mist with ScienceLogic for alerts and events monitoring and automated incident creation.
- Currently working on Fabrix AIOps integration with multiple network management platforms, including Cisco Catalyst Center, Aruba Central, Juniper Mist and Arista CloudVision.
- Managed Cisco Catalyst Center security certificate compliance activities, including certificate renewal and replacement.
- Created Standard Operating Procedures (SOPs) for Cisco Catalyst Center/DNAC-related activities and provided operational guidance to the operations team.
- Collaborated with cross-functional teams and vendors for implementation, troubleshooting, compliance, documentation and operational readiness.

Systems Engineer — Tata Consultancy Services | Jan 2020 – Jun 2022 | Chennai, India | Project: H&M;

- Led migration of Aruba Networks from Cisco across 100+ sites, ensuring seamless business continuity during PoC, pilot and rollout activities.
- Monitored and troubleshot Cisco and Aruba routers, switches, wireless clients and related network equipment.
- Created and managed Aruba Central Templates and Template Groups for Gateways and Access Points to support standardized SD-LAN deployments.
- Executed PoC, pilot and rollout migration activities by configuring Aruba SD-LAN switches, gateways and access points and coordinating endpoint testing.
- Supported access-point deployment in offices and retail stores and used Ekahau radio planning to optimize wireless coverage and performance.

- Performed network device upgrades, restorations and backups and resolved technical issues during implementations.
- Managed IP Address Management and subnetting using Infoblox for IP reservation and allocation.
- Used enterprise network management platforms including HP IMC, Cisco DNAC, Meraki and Aruba Central.
- Worked with Meraki MX Security Appliances and Access Points and supported device monitoring and health reporting.
- Integrated devices with HPE ClearPass authentication and supported network access control activities.
- Successfully deployed and configured Beronet systems for 30+ CUCM sites.

Network Engineer — Team Computers Private Ltd | Jul 2018 – Oct 2020 | Bangalore, India | Project: Wipro Enterprises

- Provided remote support for network issues, installations, troubleshooting and enterprise network operations.
- Configured, managed and maintained Cisco Catalyst 2000, 3000, 4000 and 6000 series switches and Cisco ASR routers.
- Investigated data-network faults, monitored network performance and implemented security policies.
- Managed IPS/IDS alerts using FireEye NX and created/troubleshoot Cisco VPNs on Cisco ASA.
- Followed ITIL processes and managed incidents, change requests and tasks using BMC Remedy.
- Tracked and documented network issues and prepared incident reports.

System Engineer — Precision Techserve Private Ltd | Nov 2017 – Jun 2018 | Kochi, India | Project: CTS & TVS Credit

- Provided technical support and troubleshooting for network and system issues and delivered L1 support for end users and client networks.
- Handled hardware installation, replacement and management during client onboarding and project movements.
- Created and maintained technical documentation for employee training and operational reference.
- Performed network device decommissioning and hardware repurposing activities.

SELECTED AUTOMATION & INTEGRATION HIGHLIGHTS

- Python-based Cisco switch configuration update automation.
- Cisco Catalyst Center API integration with Power BI for consolidated inventory and non-DNAC compliance reporting.
- RSA ILM integration for automated user access review as part of security compliance.
- Juniper Mist integrations with Splunk and ScienceLogic for monitoring, alerts/events and automated incident creation.
- Fabrix AIOps integration across Cisco Catalyst Center, Aruba Central, Juniper Mist and Arista CloudVision.
- DNAC security certificate renewal/replacement and compliance management.
- DNAC SOP creation and operational enablement for operations teams.

EDUCATION

Master of Computer Applications — Anna University | 2012 – 2015

Bachelor of Science in Information Technology — Bharathiar University | 2009 – 2012

PROFESSIONAL TRAINING

CCNA | Aruba Central | Network Automation | AWS | ITIL V4

ADDITIONAL INFORMATION

Network Automation: Python, Netmiko, NAPALM, Nornir, Ansible, YAML, Jinja2, GitHub. | Nautobot — Learning.
