

DINESHKUMAR K

Senior Network Engineer | Network Automation | Network Implementation | SD-WAN | Cisco Catalyst Center | Juniper Mist

Erode, India | +91-9585885884 | dineshksp16@gmail.com | linkedin.com/in/dineszk

PROFESSIONAL SUMMARY

Network Engineer with 10+ years of enterprise networking experience across Cisco, Aruba, Juniper and Arista environments. Strong hands-on experience in network implementation, migration, EOL/EOS refresh, SD-WAN, SDA/Cisco Catalyst Center, wireless and network operations. Experienced in network automation using Python and API-driven integrations, including Cisco switch configuration automation, DNAC-to-Power BI inventory synchronization, monitoring integrations, security-compliance automation and multi-vendor AIOps integrations.

CORE COMPETENCIES

Network Engineering	Routing & Switching, BGP, OSPF, EIGRP, IS-IS, MPLS, VLAN, STP, LACP, HSRP/VRRP/GLBP
Platforms	Cisco, Aruba, Juniper, Arista; Cisco Catalyst Center (DNAC), Aruba Central, Juniper Mist, Arista CloudVision
SD-WAN / SDA	Aruba Central, Meraki, Versa, Viptela; Cisco SDA / Catalyst Center
Automation	Python, Ansible, Netmiko, NAPALM, Nornir, Jinja2, YAML, REST/API integration, GitHub
Monitoring / ITSM	Splunk, ScienceLogic, HP IMC, Cisco Prime, SolarWinds, ServiceNow, BMC Remedy
Security / Compliance	RSA ILM, ClearPass, ISE basics, DNAC certificate compliance, DNS/DHCP/IPAM

PROFESSIONAL EXPERIENCE

Senior Consultant — Capgemini Technology Services | Jun 2022 – Present | India

- Led network implementation activities covering LAN, wireless, routing/switching, SDA and SD-WAN environments across enterprise projects.
- Led implementation of the first site using Juniper switches and APs, with centralized management and operations through Juniper Mist; supported the environment through operational handover.
- Worked on Cisco network migration activities for a newly acquired/procured entity into the enterprise network environment.
- Executed enterprise EOL/EOS network hardware replacement activities, supporting refresh planning and implementation.
- Created Bills of Materials (BOMs) for new network projects based on technical requirements and approved project budgets.
- Developed Python automation to perform Cisco switch configuration updates, reducing repetitive manual configuration activities.
- Integrated Cisco Catalyst Center (DNAC) APIs with Power BI to synchronize inventory and produce consolidated asset reporting for non-DNAC device compliance, avoiding manual inventory consolidation.
- Implemented RSA ILM integration to automate user access review activities as part of security compliance.
- Integrated Juniper Mist with Splunk for centralized monitoring and event visibility.
- Integrated Juniper Mist with ScienceLogic for alerts and events monitoring and automated incident creation.
- Currently working on Fabrix AIOps integrations with Cisco Catalyst Center, Aruba Central, Juniper Mist and Arista CloudVision.
- Managed Cisco Catalyst Center security certificate compliance, including certificate renewal and replacement activities.
- Supported network operations for newly implemented environments until operational handover, including troubleshooting, documentation and coordination with operations teams.

Systems Engineer — Tata Consultancy Services | Jan 2020 – Jun 2022 | Chennai, India

- Led Aruba network migration from Cisco across 100+ sites, supporting PoC, pilot and rollout activities.
- Configured Aruba Central templates and template groups for gateways and access points and supported SD-LAN deployments.
- Supported wireless implementation, endpoint testing, device upgrades, restorations and backups.
- Managed IP address reservation/allocation and subnetting using Infoblox and worked with enterprise monitoring and NAC platforms.

Network Engineer — Team Computers Private Ltd | Jul 2018 – Oct 2020 | Bangalore, India

- Supported enterprise Cisco network operations, troubleshooting and installations across Catalyst switches and ASR routers.
- Configured and troubleshoot Cisco VPNs on ASA and handled security/monitoring alerts.
- Managed incidents, changes and tasks using BMC Remedy and maintained network documentation.

System Engineer — Precision Techserve Private Ltd | Nov 2017 – Jun 2018 | Kochi, India

- Provided network and system troubleshooting support, hardware installation/replacement and client onboarding activities.

- Maintained technical documentation and supported network device decommissioning and hardware repurposing.

EDUCATION & TRAINING

Master of Computer Applications — Anna University | 2012–2015

Bachelor of Science in Information Technology — Bharathiar University | 2009–2012

Professional Training: CCNA, Aruba Central, Network Automation, AWS, ITIL V4

SELECTED CAREER HIGHLIGHTS

- **100+ sites:** Aruba network migration from Cisco.
- **Greenfield implementation:** First Juniper switches/APs site using Juniper Mist.
- **Automation:** Python-based Cisco configuration updates and DNAC API-driven Power BI inventory reporting.
- **Integration:** Mist with Splunk and ScienceLogic; RSA ILM security-compliance automation; Fabrix AIOps multi-platform integration.
- **Lifecycle:** Network implementation, EOL/EOS refresh, operations support and operational handover.
