## Senior Consultant | Network Engineering | Network Implementation & Automation

Erode, India | +91-9585885884 | dineshksp16@gmail.com | linkedin.com/in/dineszk

### OBJECTIVE

Network Engineering professional with 10+ years of experience in enterprise network implementation, migration, operations and lifecycle management. Strong hands-on experience across Cisco, Aruba and Juniper environments, with additional experience in Arista platforms, SD-WAN, SDA/Cisco Catalyst Center, enterprise wireless and network automation. Looking for opportunities to contribute network engineering, implementation, automation and multi-vendor integration expertise.

### WORK HISTORY

#### **Jun 2022 – Present Senior Consultant, Capgemini Technology Services, Coimbatore, India — Project: GIT**

- Designed, implemented and maintained enterprise network infrastructure covering Routing, Switching, Wireless, LAN, SDA and SD-WAN technologies across Cisco, Aruba, Juniper and Arista environments.
- Led implementation of a new site using Juniper switches and APs, managed through Juniper Mist; this was the first site implemented with Juniper switching and wireless in the environment.
- Supported the complete lifecycle of the newly implemented network including installation, configuration, testing, troubleshooting, operations support, documentation and operational handover.
- Worked on Cisco network migration activities for another newly acquired/procured entity and supported integration into the enterprise network.
- Worked on enterprise-wide EOL/EOS network hardware replacement activities.
- Created BOMs for new network projects based on technical requirements and approved budgets and supported hardware/software sourcing.
- Developed Python scripts to automate Cisco switch configuration updates.
- Integrated Cisco Catalyst Center (DNAC) APIs with Power BI to synchronize inventory and generate consolidated asset reports for non-DNAC device compliance, avoiding manual inventory consolidation.
- Implemented RSA ILM integration to automate user access review activities as part of security compliance.
- Integrated Juniper Mist with Splunk for centralized monitoring and event visibility.
- Integrated Juniper Mist with ScienceLogic for alerts and events monitoring and automated incident creation.
- Currently working on Fabrix AIOps integration with Cisco Catalyst Center, Aruba Central, Juniper Mist and Arista CloudVision.
- Managed Cisco Catalyst Center security certificate compliance activities including certificate renewal and replacement.
- Created SOPs for Cisco Catalyst Center/DNAC-related activities and provided operational guidance to the operations team.
- Collaborated with cross-functional teams and vendors for implementation, troubleshooting, compliance, documentation and operational readiness.

#### **Jan 2020 – Jun 2022 Systems Engineer, Tata Consultancy Services, Chennai, India — Project: H&M;**

- Led migration of Aruba Networks from Cisco across 100+ sites, ensuring seamless business continuity.
- Monitored and troubleshot Cisco and Aruba routers, switches, Wi-Fi clients and related network equipment.
- Created and managed Aruba Central Templates and Template Groups for Gateways and Access Points for standardized SD-LAN deployments.
- Executed PoC, pilot and rollout migration activities by configuring Aruba SD-LAN switches, gateways and access points and coordinating endpoint testing.
- Supported access point deployments in offices and retail stores and used Ekahau radio planning to optimize wireless coverage and performance.
- Performed network device upgrades, restorations and backups and resolved technical issues during implementations.
- Managed IP Address Management and subnetting using Infoblox for IP reservation and allocation.
- Utilized network management platforms including HP IMC, Cisco DNAC, Meraki and Aruba Central.
- Worked with Meraki MX Security Appliances and Access Points.
- Integrated devices with HPE ClearPass authentication.
- Successfully deployed and configured Beronet systems for 30+ CUCM sites.

#### **Jul 2018 – Oct 2020 Network Engineer, Team Computers Private Ltd, Bangalore, India — Project: Wipro Enterprises**

- Provided remote support for network issues and installations and improved network performance through monitoring and troubleshooting.
- Configured, managed and maintained Cisco Catalyst 2000, 3000, 4000 and 6000 series switches and Cisco ASR routers.
- Investigated data network faults and implemented security policies and monitored access.
- Managed IPS/IDS alerts using FireEye NX and created/troubleshot Cisco VPNs on Cisco ASA.
- Followed ITIL processes and managed incidents, change requests and tasks using BMC Remedy.

- Tracked and documented network issues and compiled incident reports.

#### **Nov 2017 – Jun 2018    System Engineer, Precision Techserve Private Ltd, Kochi, India — Project: CTS & TVS Credit**

- Provided technical support and troubleshooting for network and system issues and delivered L1 support for end users and client networks.
- Handled hardware installation, replacement and management during client onboarding and project movements.
- Created and maintained technical documentation for training and operational reference.
- Performed network device decommissioning and hardware repurposing activities.

### **SKILLS**

|                                 |                                                                                                   |
|---------------------------------|---------------------------------------------------------------------------------------------------|
| <b>Routing</b>                  | BGP, OSPF, EIGRP, IS-IS                                                                           |
| <b>Switching</b>                | VLAN, STP, RSTP, MSTP, LACP, PAgP, VTP, HSRP, VRRP, GLBP, VSS                                     |
| <b>Wireless</b>                 | Aruba AP/IAP, Juniper Mist APs, enterprise wireless implementation                                |
| <b>DDI</b>                      | Infoblox DNS/DHCP/IPAM                                                                            |
| <b>SD-WAN</b>                   | Aruba Central, Cisco Meraki, Versa, Viptela                                                       |
| <b>SDA / Network Management</b> | Cisco Catalyst Center (DNAC), Juniper Mist, Aruba Central, Arista CloudVision                     |
| <b>AAA / NAC</b>                | ClearPass, ISE (Basics)                                                                           |
| <b>Monitoring Tools</b>         | HP IMC, ScienceLogic, Splunk, Cisco Prime, SolarWinds                                             |
| <b>Ticketing Tools</b>          | ServiceNow, BMC Remedy, Oracle ITSM                                                               |
| <b>Automation</b>               | Python, Netmiko, NAPALM, Nornir, Ansible, YAML, Jinja2, REST/API integration, Nautobot (Learning) |
| <b>Version Control</b>          | GitHub                                                                                            |
| <b>Security / Compliance</b>    | RSA ILM, DNAC certificate compliance, access review automation                                    |

### **EDUCATION**

**2012 – 2015**    Master of Computer Applications, Anna University

**2009 – 2012**    Bachelor of Science in Information Technology, Bharathiar University

### **PROFESSIONAL TRAINING**

CCNA | Aruba Central | Network Automation | AWS | ITIL V4

### **SELECTED PROJECT / AUTOMATION HIGHLIGHTS**

- **Python:** Cisco switch configuration update automation.
- **DNAC API:** Power BI inventory synchronization and non-DNAC compliance reporting.
- **Security:** RSA ILM user access review automation and DNAC certificate compliance.
- **Monitoring:** Juniper Mist integrations with Splunk and ScienceLogic, including automated incident creation.
- **AIOps:** Fabrix integration with Cisco Catalyst Center, Aruba Central, Juniper Mist and Arista CloudVision.
- **Operations:** DNAC SOP creation and operational enablement for the operations team.
- **Migration:** Aruba migration from Cisco across 100+ sites and Cisco network migration activities.
- **Implementation:** First Juniper switch/AP site implementation and lifecycle support through operational handover.

### **DECLARATION**

I hereby declare that the above-written particulars are true to the best of my knowledge and belief.
