Objective

Network Engineering professional with 11+ years of overall experience, including 9 years in networking, specializing in enterprise network implementation, migration and operations. Strong hands-on experience with Cisco, Aruba and Juniper, including Cisco Catalyst Center (DNAC), Juniper Mist, SD-WAN, wireless and Python-based network automation. Experienced in API integrations, monitoring, security compliance and multi-vendor AIOps.

Work History

- Jun 2022 – **Senior Consultant**, Capgemini Technology Services, Coimbatore, India, Project – GIT
- Present
- Designed, implemented and maintained enterprise network infrastructure covering Routing, Switching, Wireless, LAN, SDA and SD-WAN across Cisco, Aruba, Juniper and Arista environments.
 - Managed network implementation lifecycle including HLD/LLD creation, network topology documentation, installation, configuration, testing, upgrades and operational handover.
 - Led implementation of the first Juniper Mist site using Juniper switches and APs.
 - Worked on Cisco network migration for a newly acquired/procured entity and supported integration into the enterprise network.
 - Worked on EOL/EOS network hardware replacement activities across the enterprise.
 - Created BOMs for new network projects based on technical requirements and approved budgets.
 - Developed Python scripts for Cisco switch configuration updates.
 - Integrated Cisco Catalyst Center (DNAC) APIs with Power BI for inventory synchronization and consolidated non-DNAC compliance reporting.
 - Worked on multi-vendor API integrations and automation across RSA ILM, Splunk, ScienceLogic, Cisco Catalyst Center, Juniper Mist, Aruba Central and Arista CloudVision for security compliance, monitoring, reporting and AIOps use cases.
 - Currently working on Fabrix AIOps integration with Cisco Catalyst Center, Aruba Central, Juniper Mist and Arista CloudVision.
 - Managed DNAC security certificate renewal/replacement and created DNAC SOPs for the operations team.
- Jan 2020 – **Systems Engineer**, Tata Consultancy Services, Chennai, India, Project – H&M
- Jun 2022
- Led the migration of Aruba Networks from Cisco across 100+ sites, ensuring seamless business continuity.
 - Monitored and troubleshooted Cisco and Aruba routers, switches, and Wi-Fi clients, along with diverse network equipment.
 - Created and managed Aruba Central Templates and Template Groups for Gateways and Access Points, enabling standardized SD-LAN deployments.
 - Executed PoC, pilot, and rollout migration activities by configuring Aruba SD-LAN devices including switches, gateways, and access points, and coordinated with clients for endpoint testing.
 - Provided implementation support for deploying access points in offices and retail stores, utilizing Ekahau radio planning to optimize wireless coverage and performance.
 - Resolved technical issues during project implementations.
 - Performed network device upgrades, restorations, and backups.
 - Managed IP Address Management (IPAM) and subnetting using Infoblox for IP reservation and allocation.
 - Utilized network management tools such as IMC, Cisco DNAC, Meraki, and Aruba Central.
 - Hands-on experience with Meraki MX Security Appliances and Access Points.
 - Documented network details and reported health status.
 - Integrated devices with HPE ClearPass authentication.
 - Successfully deployed and configured Beronet systems for 30+ CUCM sites.

- Jul 2018 – **Network Engineer**, *Team Computers Private Ltd*, Bangalore, India, Project – Wipro
 Oct 2020 Enterprises
- Provided remote support for network issues and installations.
 - Improved network performance through monitoring and troubleshooting.
 - Configured, managed, and maintained Cisco Catalyst 2000, 3000, 4000, and 6000 series switches, along with Cisco ASR routers, to support enterprise network operations.
 - Investigated data network faults.
 - Implemented security policies and monitored access.
 - Managed IPS/IDS alerts using FireEye NX device.
 - Created and troubleshot Cisco VPNs on Cisco ASA.
 - Followed ITIL processes and managed incidents, change requests, and tasks using BMC Remedy.
 - Tracked and documented network issues; compiled incident reports in the system.

- Nov 2017 – **System Engineer**, *Precision Techserve Private Ltd*, Kochi, India, Project – CTS & TVS
 Jun 2018 Credit
- Provided technical support and troubleshooting for network and system issues.
 - Delivered L1 support for end-users and client networks.
 - Handled hardware installation, replacement, and management during client onboarding and project movements.
 - Created and maintained comprehensive technical documentation to facilitate employee training and ensure accessible reference for ongoing operations.
 - Performed network device decommissioning activities and repurposed hardware to meet evolving project and business requirements, ensuring optimal resource utilization and reduced costs.

Skills

Routing	BGP, OSPF, EIGRP, IS-IS, MPLS(Basics)
Switching	VLAN, STP, LACP, PAGP, VTP, HSRP, VRRP, GLBP, VSS
Wireless	Aruba, Juniper Mist, Arista – enterprise wireless AP deployment & management
ACL	Standard, Extended
DDI	InfoBlox (DNS/DHCP/IPAM)
SD-WAN	Aruba Central, Cisco Meraki, Versa, Viptela
SDA	Cisco Catalyst Center (DNAC), Juniper Mist, Arista CloudVision
AAA/NAC	ClearPass, ISE (Basics)
Monitoring Tools	HP IMC, ScienceLogic, Cisco Prime, SolarWinds
Ticketing Tools	ServiceNow, BMC Remedy, Oracle ITSM
Automation	Python, Ansible, YAML, Jinja2, Nautobot (Learning)
Version Control	GitHub

Education

- 2012 – 2015 **Master of Computer Applications**, *Anna University*
 2009 – 2012 **Bachelor of Science in Information Technology**, *Bharathiar University*

Professional Training

- ☐ CCNA
- ☐ Aruba Central
- ☐ Network Automation
- ☐ AWS
- ☐ ITIL V4

Declaration

I hereby declare that the above-written particulars are true to the best of my knowledge and belief.
